Machinery packing procedur

To plan for packing a shipment and ensure proper machine character, weight, dimension and communication with shipper/customer, about packing type and special requirements of customer /shipper if any.

To ensure that proper technique are used while packing component protection during handling and smooth transportation.

Packing materials and tools:

The quality and type of packing and materials used for packing are determine safe transportation in transit and handling , the various packing materials used most frequently are:

1. Hard wood, pine wood,
2. Ply wood 10-12 mm MR Grade. Sami water proof
3. Corrugated card board boxes, //cartons.
4. Corrugated paper roll,
5. Craft paper,
6. Air Bubble sheet, EP FOAM, Polythene sheet,
7. Stretch rapper, plastic strap.
8. VCI Sheet, Aluminium foil rapper (vacuum packing) high standard.
9. Silica gel, dehumidifier sac etc.
10. Various type of power tools, fastener, hardware etc.

WOODEN PALLET PACKING PROCEDURE:

Various type of pallet are provide as per cargo character and weight and dimension , that is

- a) Four way entry pallet
- b) 1200x800 euro pallet
- c) four way entry open base.
- D) Two way open platform base pallet etc.

Often simply we can figuring palletization to ensure handling and smooth transportation , about the staking palletization each layer oriented the same way, resulting main column of cartons. Support the column hole the pallet together if the pallet strap and create a gap and the carton are unsupported.

The carton are untouched the rapped by stretch film and carton can crash and damage .Customs pallet can be expensive.

Pallet Samp

The cartons are palletization as per volume ration by holding more products which by the way minimize the shipping cost . now the strap and rapped are tight to the carton and stretch rapper as a one integrated unit .

Wooden case, ply wood case , open crate

Over the 17 years of crate manufacturer and packers experiences a high quality

shipping crate for industrial commercial business need.

Our crate manufacturing process to ensure accuracy and specific details for the finish crate. Crate are assemble are superior method and international standard , If case and crate weight are exceeding and handle by fork lift or crane the packed goods shall be secured within the case against horizontal forces (tilting, shunting, fixing of slings etc) to withstand such loads without any damage , securin by frame, cushioning between machine and case wall etc.

Due to the long transportation and storageg can be done nailing, bolting to the skids or the base. Fixing to the base periods , all sensitive equipment additionally to the anti corrosive protection probably applied by the shipper/manufacturer of the goods. Have to be protected against corrosion.

PACKING OF HEAVY MACHINERY

The Large and heavy dimension wooden case, ply wood case , open crate using over dimension panel and heavy duty and thickness hard wood , pine wood , plank, vertical and horizontal battens inside or outside designed for a top load as per machine/component gross weight. Skid or base can nut bolt to be heavy load and suitable for lifting by forklift and crane.

Heavy duty case, ply wood case, open crate, give your products protection for export, domestic and storage. Construct as per machine weight and dimension wit export ISPM 15 measure and requirements.

Cushioning machine on wooden skid or base by soft and semi hard polythene foams to protect shock and vibration during transit.

Suitable for inner packing physical protection of machine , rapping water proof polythene sheet, air babble sheet, EP foam, put inside silica gel or dehumidifier sac, rapping by stretch rapper.

Vacuum Packing

Vacuum packing//High standard seaworthy packing:

Due to the long transportation and storage periods all sensitive equipments (Gears, machinery, bearings, fittings , electric panel, parts with super finish etc) have to be protected against corrosion . Machine are barrier by Aluminium foil inside wooden case, ply wood case or open crate. Aluminium foil can protect the machine from -10 degree centigrade to +90 degree centigrade temperature. Before finally sealing the Aluminium foil the air contained shall be extracted (vacuum) for the absorption of the air humidity a sufficient quantity of desiccant silica gel shall be added .

HANDLING & SHIFTING OF HEAVY MACHINERY & EXHIBIT

I would like to take opportunity to introduce myself. I had been worked in "Allied Lemuir India Pvt. Ltd" a joint venture of Allied International packing & moving services world wide since 2003 to 2006, DB Schenker India Pvt. Ltd since 2006 to 2016 years. I have move ahead & established my own family business for the better prospects.

We have dedicated service for local , domestic and International services. Heavy machinery and Exhibit inside factory/plant and exhibition stall/Hall as well as Medical equipments (analyzer machine , Biomedical equipments , CT SCAN, MRI Machine) inside hospital lab etc.

We have dedicated services we value of your requirements for shifting of machinery . Our people are very professional thoroughly trained to take care your machinery, Exhibit to handle and deliver on time along with proper handling equipments tools and tackles.

We have also experience in Handling many exhibition events conference etc;

WELD INDIA, IFEX , INDPLUS, RICE TECH EXPO, INDIA INTERNATIONAL TEA & COFFEE EXPO, FOOD TECH, PRINT PACK, COLON MESSE SHOW AHHAR, DERMACON, ACBICON etc.

Our scope of work will be as under :

1. Complete on site handling, unpacking , repacking manpower, forklift, crane.
2. 24 hours onsite assistance during the exhibition at the time of move in and move out.
3. Handling of empty case/cartons.
4. Customs clearance under invoice packing list, temporary , Bank guarantee & permanent basis .
5. Intermediate storage, before & after exhibition
6. Local and domestic transportation etc.

INTERNATIONAL RELOCATIONS OF HOUSE HOLD GOODS - PERSONAL EFFECT:

SK INDUSTRIAL PACK Individual services makes your relocation perfect. Starting with the entire planning and organizing up to the smooth handling for LCL & FCL shipment.

Relocation is much more than lifting pianos-especially if the new residence is located in foreign country.

What must be packed? Loading of lift vans & container? which transportation route is the most favorable? What about price, security, insurance, customs clearance? Shipping information a lot more? Pre advice to destination agent? These are the question we ask and find solutions so that shipment
